| Patent No. 5591577
| GENERAL INFORMATION:
| APPLICANT: TRUCHIYA, MAKOTO
| APPLICANT: MINA, KIYOSHI
| TITLE OF INVENTION: MOBILE GENETIC ELEMENT ORIGINATED FROM
| TITLE OF INVENTION: BREVIBACTERIUM STRAIN
| NUMBER OF SEQUENCES: 9
| CORRESPONDENCE BADRESS: 3
| ADDRESSEE: OBLON, SPIVAK, MCCLELLAND, MAIER & NEUSTADT
| STREET: 1755 S. JEFFERSON DAVIS HIGHWAY, FOURTH FLOOR
| CITY: ARLINGTON | STRAIN | STRAIN | STRAIN | STREET: 1755 S. JEFFERSON DAVIS HIGHWAY, FOURTH FLOOR | STREET: WINDOWN | STRAIN | STREET: WINDOWN | STRAIN | STREET: WINDOWN | STRAIN | ST
                                                                                                                                                                                                                                                                                                                                                    0;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Query Match

Fatent No. 5807743
GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: MCSWiggen, James A.
TITLE OF INVENTION: METHOD AND REAGENT FOR THE
TITLE OF INVENTION: TREATMENT OF DISEASES
TITLE OF INVENTION: TREATMENT OF DISEASES
TITLE OF INVENTION: INTERLEUKIN-2 RECEPTOR
TITLE OF INVENTION: MASCOLATED WITH
TITLE OF INVENTION: GAMMA-CHAIN EXPRESSION
NUMBER OF SEQUENCES: 1379
CORRESPONDENCE ADDRESS:
ADDRESSE: Lyon & Lyon
STREET: 633 West Fifth Street
STREET: Los Angeles
CONTANT: California
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 14, Application US/09328501A

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Length 15;
Sequence 1365, Application US/08585684B
Patent No. 5877021
GENERAL INFORMATION:
APPLICANT: Strinchcomb, Daniel T.
APPLICANT: Jarvis, Thale
TITLE OF INVENTION: METHOD AND REAGENT FOR THE
TITLE OF INVENTION: MUDUCTION OF GRAFT TOLERANCE
TITLE OF INVENTION: AND REVERSAL OF IMMUNE RESPONSES;
NUMBER OF SEQUENCES: 2751
CORRESPONDENCE: Lyon & Lyon
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          APPLICANT: Stinchcomb, Daniel T.

TREATMENT OF PROMYELOCYTIC
LEUKEMIA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 780, Application US/08291932A

Sequence 780, Application US/08291932A

Patent No. 5658780

GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: McSwiggen, James
TITLE OF INVENTION: RIBOZYME TREATMENT OF
TITLE OF INVENTION: RELATED TO LEVELS OF
TITLE OF INVENTION: NF-XB

TITLE OF INVENTION: NF-XB

TITLE OF INVENTION: NF-XB

NUMBER OF SEQUENCES: 830

CORRESPONDENCE ADDRESS:
ADDRESSEE: Lyon & Lyon
STREET: 633 West Fifth Street
STREET: Suite 4700

CITY: Los Angeles
STREET: Galifornia
COUNTRY: U.S.A.
ZIP: 90071-206

COMPUTER REALABLE FORM:
MEDIUM TYPE: Storage

COMPUTER: IBM Compatible
  TITLE OF INVENTION: METHOD AND REZ
TITLE OF INVENTION: TERRATMENT OF I
TITLE OF INVENTION: LEUKEMIA
NUMBER OF SEQUENCES: 62
CORRESPONDENCE ADDRESS:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 2, Application US/08527060
Patent No. 583440
GENERAL INFORMATION:
APPLICANT: Goldenberg, Tavi
APPLICANT: Tritz, Richard
TITLE OF INVENTION: RIBOZYME THERAPY FOR THE TREATMENT
TITLE OF INVENTION: AND/OR PREVENTION OF RESTENOSIS
CORRESPONDENCES: 35
CORRESPONDENCES: 35
CORRESPONDENCES: SEED and BERRY
STREET: 6300 Columbia Center, 701 Fifth Avenue
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                COMPUTER READABLE FORM:
